

Gas Storage Licensing Management System

The screenshot displays the 'Gas Depot System' interface. At the top, there is a header with the text 'Charge Password' on the left, the user's name 'Captain Ali Mahmoud Hassan Rabuh' in the center, and the system name 'Gas Depot System' on the right, accompanied by a logo. Below the header, a message states 'Main Approval 10 Completion of Work 100 Renewal President Change Inclusion Depot'. The main content area is titled 'Create a preliminary approval transaction for a gas depot site'. This area contains a form with a light blue header 'Depot Information'. The form has a grey bar at the top labeled 'Area Information'. Below this, there is a green 'Add' button, a 'New Area' input field, an 'Area' dropdown menu, and a 'Governorate Select Governorate' dropdown menu. Further down, there is a 'Basic Name' input field, a 'القوانين رقم الحواشي' (Regulations Number of Notes) dropdown menu, and a 'Plot Number' input field. At the bottom of the form, there is a 'Justification Information' section with a 'Select Section' dropdown menu, a 'Prevention and Hazard Protection Section' dropdown menu, and a 'Directorate of Judicial Defense Select Directorate' dropdown menu. A small blue button with the Arabic word 'إضافة' (Add) is located at the bottom left of the form.

Gas Storage Licensing Management System

The system aims to record and document data of gas storage facilities and electronically manage the processes of issuing and renewing licenses, with the ability to define storage capacity. It ensures public safety and enables effective management of the gas sector in line with regulatory requirements and approved technical standards.

System Features

1. Entering and updating data of gas storage facilities and their associated vehicles.
2. Monitoring the licensing status of each storage facility (Active, Expired, Under Renewal, Suspended).
3. Electronically documenting all licensing procedures and approvals.
4. Tracking the license status of vehicles and tankers associated with each storage facility.
5. Facilitating access to storage facility details and operational records.
6. Issuing automatic alerts when a facility or vehicle license is about to expire.
7. Displaying statistics of active, expired, and suspended storage facilities.
8. Generating performance, safety, and activity review reports.
9. Printing licensing and detailed information reports for each facility.
10. A fast, user-friendly interface suitable for all user levels.

System Capabilities

1. Quick search for storage facilities by name, national ID, or region.
2. Displaying license details and attached documents for each facility.
3. Submitting new license applications electronically and tracking them step by step.
4. Managing user permissions (System Administrator - Safety Department - Inspection - Licensing).
5. Tracking operations and records for administrative review and auditing.
6. Supporting electronic attachments (e.g., document images, licenses, or safety reports).
7. Future development potential using AI algorithms to estimate the need for new storage facilities based on demand and consumption in different regions.
8. Integrated notification system via email or SMS to alert users about updates and licensing statuses.
