Security Check Application

It enables field workers check persons and vehicles using smart devices without the need to contact with the main operation rooms
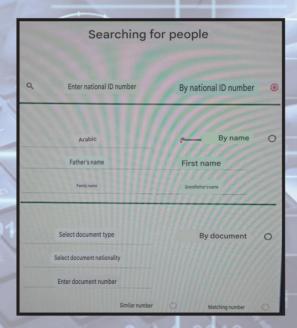

The system provides

1. Review the persons' data.
2. Review the judicial request.
3. Review the vehicle's information.

System Features

1. The application is easy to be used.
2. Security check process became faster, without referring to the main operation rooms.
3. Define the users' permissions.
4. Implement the security policy on smart devices.
5. The possibility to improve and update the system.

System Benefits

1. Facilitate decision making.
2. Using the new technology in the security sector.
3. Save time and efforts.
4. Reduce the financial expenses.
